QUICK HISTORY

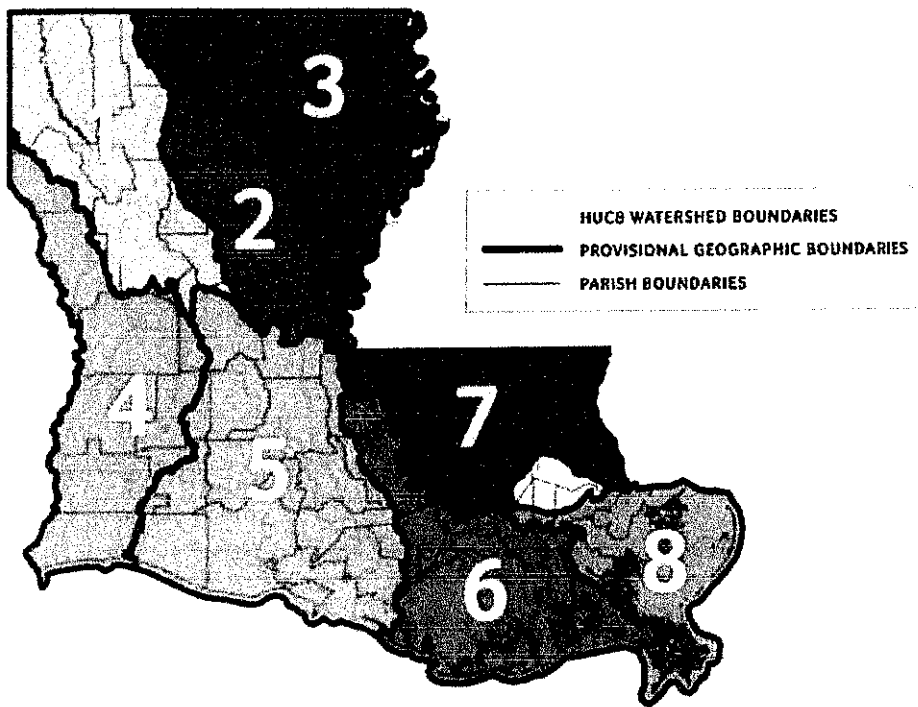

Following the Great Floods of 2016, the state launched the Louisiana Watershed Initiative – a \$1.2 billion HUD-funded effort aimed at reducing flood risk, guided by the following principles within the subsequent provisional watershed regions:

Using scientific tools and data

Enabling transparent, objective decision-making

Maximizing the natural function of floodplains

Establishing regional watershed-based management of flood risk

LOCAL LEADERSHIP

Each parish appointed representatives to serve on regional steering committees to develop governance recommendations and aid in project selection for improved watershed management. LWI's Capacity Building Grant funded local staff to coordinate and provide technical support to the committee and each community per region.

RECOMMENDATIONS – WHO, WHO, AND HOW IN THE FUTURE? GOOD FROM THIS REPORT

WHAT IS THE WORK TO BE DONE BY THIS COALITION?

The Regional Watershed Coalition should conduct regional watershed management and assist local entities with watershed planning, policy, project prioritization, and data/modeling in the following ways:

Planning and Development Regulation, Including Technical Assistance

- The coalition should conduct regional planning to preserve some areas, retain water, and coordinate and prioritize O&M of river systems in region.
- The coalition should potentially be tasked with facilitating updates to NFIP maps and building standards.
- The coalition should provide floodplain management and other flood related technical assistance to communities within the region and address the capacity needs of smaller jurisdictions and rural areas.

Project Implementation

- The coalition should facilitate the development of projects, especially those that are passive (low O&M)
- The coalition should review major projects for watershed impacts.
- The coalition should coordinate with upstream states to improve channel health before it gets to Louisiana.
- The coalition should provide grant development and match funding opportunities to local jurisdictions.

Data and Modeling

- The coalition should be tasked with housing and operating the LWI watershed model for Region 2.

Outreach and Engagement

- The coalition should provide public outreach and education to residents and local leaders.

ROADMAP TO IMPLEMENTATION – WHO AND HOW

In order to successfully implement the recommendation above, the RSC recommends the following implementation steps:

- The coalition should be a new entity/political subdivision similar to the regional steering committee enabled by legislation under state charter.
- All of the watershed coalitions in the state should be authorized by a single charter that includes a list of standards and authorities identified by all regions, wherein each region is able to choose which standard or authority to implement and at what degree within individual coalition bylaws/regional charters as approved by participating parishes.
- The coalition should be composed of a mix of public and private representatives.
- The coalition should have oversight by a state agency which provides consistency and state-level management.
- The Kisatchie-Delta Regional Planning and Development District in partnership with the Rapides Area Planning Commission shall facilitate all meetings of the Coalition and shall perform administrative and technical functions related to the work of the Coalition.
- ~~The regional watershed boundaries should be recognized or approved by a state agency or board.~~
- ~~The coalition should have the ability to obtain external funding and maintain stable local funding.~~
- The state should lead the effort in drafting the legal elements that reflect these recommendations while the regions collect feedback on provisional recommendations and the regions should be kept aware of continued progress.
